

## PRESENTATION

# DATABASE “SCIENTIFIC LANGUAGE” - AN ASSISTANT IN CREATING RESEARCH TEXTS

BY **DR. AGNESE DUBOVA**

(VENTSPILS UNIVERSITY OF APPLIED SCIENCES)

The web application “Scientific Language” is a digital tool, created to assist users of several educational backgrounds in the composition of Latvian scientific texts. It includes a description of the several types of scientific texts, as well as a glossary with descriptions of the terms used in them. In the database, you can find examples of phraseology used in Latvian scientific texts, classified by introduction, main part, and epilogue as well as the transitions and source references. You can find the database under: [www.zinatnesvaloda.lv](http://www.zinatnesvaloda.lv)

## ABOUT THE SPEAKER:

**Dr. Agnese Dubova** is a senior lecturer at the Faculty of Translation Studies of the Ventspils University of Applied Sciences. In her researches, she emphasizes contrastive linguistics (German-Latvian), language contacts, scientific language, and academic writing in German as a foreign language. From 2018 until 2020 she was the manager of the state-funded research project “Latvian Scientific Language from an Interlinguistic Perspective”, which in collaboration with IT specialists and linguists from the Ventspils University of Applied Sciences and University of Liepaja lead to the development of the database “Scientific Language”.
