

LECTURE

HOW GENERAL DATA PROTECTION REGULATION AFFECTS IT SECURITY

BY **PROF. DR. TOBIAS EGGENDORFER**
(RAVENSBURG-WEINGARTEN
UNIVERSITY OF APPLIED SCIENCES)

Some see the General Data Protection Regulation (GDPR) as a bureaucratic monster, creating a massive overhead for entrepreneurs: But is it that bad? More often than not, obeying to the GDPR enhances IT security measures, prevents cyber-attacks, reduces their side effects and helps to assess IT systems. This lecture will show why and how GDPR and IT security interact, and how GDPR actually helps enhancing IT security.

ABOUT THE SPEAKER:

Prof. Dr. Tobias Eggendorfer is a professor for IT security at the Ravensburg-Weingarten University of Applied Sciences, he also serves as the university's data protection officer. Prior to that, he was a professor for IT forensics in Hamburg. He is also a freelance IT security consultant and external data protection officer. He holds a long publication record both in technical as well as legal context.
